I am not sure that in these untested times that a review for the next 20 years is appropriate. I accept that we have to acknowledge the present and anticipate the future but this is now in unanticipated times with unknown liabilities. I would like to see this review halted so that a more informed amended appraisal (taking account of recent brexit vote and financial consequences) can be factored in. We are already under severe fiscal constraints and ever increasing pressures from central government, while trying to increase revenue through acceptance of mayoral/independence issues, without full consultation with Darlington dwellers. I do not appose the plan but require more evidence of the need for a larger population, without the infrastructure to support it, in the prevailing circumstances.
