Subject: Sustainability Appraisal Scoping Report

Please find below my comments regarding the Sustainability Appraisal Scoping Report

1) *Are there any other plans, policies or programmes that you think should inform the Sustainability Appraisal of the Darlington Local Plan?*

The comments/issues raised in the previous Making & Growing Places consultation should also be used to inform the Sustainability Appraisal. There were various comments & issues raised regarding the sustainability of the sites for housing development, particularly the site at Muscar House Farm, which would suggest that development would be contrary to the sustainable development objectives that you are suggesting and which seem to have been ignored when developing the Interim Planning Position Statement.

Regards
